PROFESSIONAL SUMMARY

Frontend Engineer building scalable web applications using React.js, Next.js, TypeScript, Redux Toolkit, REST APIs, SSR, responsive design, and modern frontend architecture. Experienced in RBAC implementation, Razorpay integrations, performance optimization, CI/CD deployment, accessibility (WCAG), and Agile development. Skilled at translating Figma designs into high-performance, pixel-perfect user interfaces.

WORK EXPERIENCE

Associate Software Engineer (Frontend)

Dec 2024 – Present

Webtrex Software Services

Hyderabad

- Built reusable React.js component modules with Tailwind CSS, GSAP, and AOS animations, reducing UI development product.
- Integrated Razorpay payment gateway into subscription and event management systems, enabling real-time payment processing for active users.
- Implemented Role-Based Access Control (RBAC) for Admin and Standard user roles, securing access to sensitive dashboard features across the application.
- Developed dynamic admin dashboards with data visualization charts and advanced multi-filter systems, improving decision-making speed for internal teams.
- Participated in CI/CD deployment pipelines using CloudPanel, maintaining 99%+ uptime across production releases.
- Collaborated in Agile sprint planning (2-week cycles), consistently delivering features on time across cross-functional teams.
- Leveraged GitHub Copilot and AI development tools to improve personal coding efficiency by accelerating feature delivery.

Associate Software Engineer (Frontend)

Mar 2022 – Feb 2024

Mindflur System LLP

Bengaluru

- Developed frontend modules including Audit Management, Non-Conformance Reporting, and Risk Management using React.js, reducing manual tracking effort.
- Integrated RESTful APIs using Axios into React components, enabling real-time data rendering across interactive dashboards.
- Implemented Redux state management architecture across the application, reducing prop-drilling and improving component re-render performance.
- Built fully responsive layouts with accessibility (a11y) compliance (WCAG 2.1 AA), improving usability across mobile, tablet, and desktop breakpoints.
- Used React Router for client-side navigation across application screens, ensuring seamless single-page application experience.
- Collaborated with backend engineers and QA teams in Agile sprints, maintaining code quality via peer reviews and Git-based Azure Repos workflows.

KEY PROJECTS

BNRDA — Internal Enterprise Platform

- Built employee and department management modules with real-time chat and instant alert systems, improving internal communication efficiency for 200+ users.

- Developed data visualization dashboards integrating multiple organizational data streams, enabling real-time monitoring of business KPIs.
- Automated deployment pipelines using cloud-based CI/CD tools, cutting average deployment time by 50%.
- Tech stack: React.js, Node.js, Express.js, REST APIs, Redux, CloudPanel CI/CD

MM BNRDA — Lead & Order Management System

- Engineered lead generation, order management, and customer review systems with full CRUD functionality, supporting operations for 300+ records.
- Built admin dashboards with RBAC for multi-role user access, reducing unauthorized data access incidents to zero post-launch.
- Tech stack: React.js, TypeScript, REST APIs, Redux, Tailwind CSS

Rao's Business Marketing Platform

- Developed event management, employee management, and membership subscription modules for a B2B marketing platform serving 1,000+ members.
- Integrated Razorpay secure payment gateway for subscription transactions, achieving 99.5% payment success rate in production.
- Implemented dynamic testimonial and feedback systems, increasing customer engagement metrics.
- Tech stack: React.js, Next.js, Razorpay, GSAP, Tailwind CSS, CloudPanel
