

MD AZIZUL ISLAM

Software Engineer | Full Stack Developer | Backend Engineer | AI & Cloud Engineering

+91 7407189289 mdazizul8741@gmail.com www.linkedin.com/in/mdazizul7 github.com/Azizul-11 West Bengal, India

SUMMARY

Software Engineer with hands-on experience developing full-stack applications, cloud-native backend systems, and AI-powered solutions. Proficient in React.js, TypeScript, Node.js, PostgreSQL, MongoDB, AWS Lambda, AWS Step Functions, Supabase, REST APIs, and SQL, with expertise in API development, serverless ETL pipelines, database engineering, and payment integrations. Successfully migrated and validated 250,000+ production records while achieving 100% data parity. Seeking Software Engineer, Full Stack, Backend, or Frontend opportunities.

PROFESSIONAL EXPERIENCE

Software Engineer

Dumroo AI 12/2025 - Present
Growth Path: Software Development Engineer Intern (Dec 2025 - Jun 2026) → Software Engineer (Jul 2026 - Present)

- Engineered an AI-powered **RAG platform** using React, Supabase, PostgreSQL, and pgvector, accelerating enterprise semantic search performance by 45%.
- Architected document ingestion pipelines, vector retrieval infrastructure, and **Stripe-powered affiliate services**, ensuring 99.9% transaction reliability.
- Orchestrated serverless ETL workflows with **AWS Lambda** and **AWS Step Functions**, processing educational data for 2+ enterprise school districts.
- Optimised **AWS Lambda** transformation logic, recovering **500+ assessment records** while preserving microservice isolation and data processing accuracy.
- Executed **PostgreSQL** migrations for **250,000+** relational records using advanced SQL, CTEs, constraints, and **RBAC-enabled** schema management.
- Validated production data through aggregate SQL reconciliation, delivering **100%** staging-to-production consistency before enterprise deployments.
- Modernised **Stripe** pricing, entitlement, and webhook workflows, reducing subscription race-condition incidents by 90% through asynchronous processing.

Full Stack Developer Intern

Preplnsta 01/2024 - 03/2024

- Created a **MERN-based content management system** enabling video uploads, streaming, and digital content administration for 100+ internal users.
- Implemented **Role-Based Access Control (RBAC)** and **RESTful APIs**, strengthening application security while ensuring controlled access across user roles.
- Accelerated **API performance** by **20%** through **MongoDB** query optimisation, indexing enhancements, and backend performance tuning.
- Refined backend architecture with scalable **Express.js** services, improving maintainability and supporting increasing application workloads.

FREELANCING

Full Stack Developer

Anjali Enterprise 05/2025 - 06/2025

- Launched a scalable **e-commerce solution** featuring advanced search, filtering, secure checkout, and inventory dashboards managing 100+ products.
- Automated payment processing and order tracking through **Razorpay** integration, increasing checkout efficiency by 35% and improving customer experience.

Full Stack Developer

Intuitive Robotics 12/2024 - 04/2025

- Designed a scalable **IoT monitoring solution** supporting real-time healthcare diagnostics across **10+ hospitals**, improving operational efficiency.
- Delivered a hybrid **e-commerce** and **e-learning platform** supporting 20+ courses, robotics products, Razorpay payments, and order management.
- Integrated **REST APIs**, **RBAC**, analytics dashboards, and administrative modules, boosting platform scalability by 30% and simplifying user operations.

PROJECTS

NearAid - Real-Time Emergency Assistance Platform

Tech Stack: React.js, Node.js, MongoDB, Socket.io, JWT, MongoDB 2dsphere | [Link](#)

- Developed a geospatial emergency assistance platform using MongoDB 2dsphere indexing, enabling nearby help requests with real-time location discovery.
- Enabled live messaging, location sharing, JWT authentication, and protected routes, providing secure real-time communication for emergency responders.

AI-Powered Fake News Detection Platform

Tech Stack: React.js, Node.js, OpenAI GPT API, Netlify | [Link](#)

- Built an AI-powered news verification application leveraging OpenAI GPT, achieving 90%+ classification accuracy on real-world datasets.
- Deployed the application on Netlify with secure API integration and responsive interfaces, ensuring reliable and scalable content verification.

EDUCATION

Bachelor of Technology (Computer Science & Engineering)

Swami Vivekananda University CGPA **8.20 / 10**
2022 - 2026

CERTIFICATIONS

- AWS APAC – Solutions Architecture Job Simulation – Forage (2024)
- Full Stack Web Development (MERN Stack) – Preplnsta
- Intermediate Coding in C++ – Preplnsta
- CPP Programming – Preplnsta
- C Programming – Preplnsta

KEY ACHIEVEMENTS

- Promotion to Software Engineer - Dumroo AI**
Recognised with promotion from Software Development Engineer Intern to Software Engineer
- Competitive Selection**
Selected among 2 candidates from 300+ applicants for a full-time Software Engineer role
- Hackathon Winner**
Won the Winter Fest 2025 Hackathon for an innovative full-stack solution

SKILLS

Programming Languages & Web Technologies
C++, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3, JSON, DOM Manipulation, Asynchronous Programming, Data Structures & Algorithms

Frontend Development
React.js, Vite, Tailwind CSS, React Hooks, Context API, State Management, Component-Based Architecture, Responsive UI Development, Client-Side Routing, UI Optimisation

Backend Development & APIs
Node.js, Express.js, REST API Development, API Integration, Supabase Edge Functions, Deno, Authentication & Authorisation, Role-Based Access Control (RBAC), Webhook Integration, Serverless Computing, Microservices Architecture, Payment Gateway Integration

Databases & Cloud Technologies
PostgreSQL, MongoDB, pgvector, InfluxDB, Redis, Database Design, SQL Query Optimisation, Database Migration, AWS Lambda, AWS Step Functions, ETL Pipelines, Serverless Architecture, Vector Databases

AI, Data Engineering & Enterprise Solutions
Retrieval-Augmented Generation (RAG), LLM API Integration, Semantic Search, Vector Embeddings, Document Ingestion Pipelines, Data Validation, Data Reconciliation, Enterprise Pricing Architecture, Stripe Connect, Stripe API, IoT Platform Development, E-Commerce Solutions

Developer Tools, DevOps & Deployment
Git, GitHub, Postman, CI/CD, Supabase, Netlify, Render, Grafana, Razorpay API, Performance Optimisation, Debugging & Troubleshooting
