Experience

Hy-Vee

Jan 2026 – June 2026

Software Engineer Intern

Bengaluru, Karnataka

- **Shipped** 12+ production features and critical fixes across **Next.js**, React, and **React Native** commerce applications.
- **Improved Core Web Vitals** by **20%+** using image optimization, lazy loading, and rendering optimizations.
- **Optimized** the *Buy Again* module using pagination, React Context, and Next.js routing, reducing **API requests by 30%**.
- **Built** 10+ observability runbooks using **Splunk Logs Explorer**, Grafana, and GCP, reducing **MTTR by 25%**.
- **Developed** end-to-end test cases for the Priority Orders feature, validating critical workflows across development and production environments.

Coder's Gyan

Jan 2025 – Mar 2025

Automation Engineer

Remote – Russia

- **Automated** server ops and reporting with JS/TS and Discord.js, reducing manual effort by **40%**.
- **Optimized** record retrieval using Redis caching, cutting DB hits by **30%** and improving performance.
- **Built** a scalable bot system with dynamic credentials and cron scheduling for real-time leaderboard updates.

UndrAds

May–Oct 2024

Software Engineering Intern

Remote – Dubai

- **Revamped** React app with Next.js, TypeScript, SSR, and lazy loading, improving SEO by **35%** Web Vitals by **45%**.
- **Reduced** load time from 2.5s to **60ms** via streaming, tree shaking, code-splitting, lowering costs by **30%**.
- **Integrated** WordPress headless CMS via GraphQL and Jest tests, cutting infra costs by **20%** and regressions by **25%**.

Projects

Askie | React.js, Node.js, Docker, PostgreSQL, Razorpay, AWS, Redis

Live Demo | GitHub

- Built an AI-powered Q&A platform with microservices, enabling context-aware answer generation, tagging, and factual validation.
- Reduced API latency by **50%** using Redis caching, rate limiting, and optimized data-fetching pipelines.
- Improved frontend performance by **30%** via lazy loading and suspense, and integrated secure Razorpay payment workflows.

React Tube | React, Redux, Socket.io, Tailwind CSS

Live Demo | GitHub

- Built a modular video platform using **React**, **Redux**, and **Socket.io**, reducing component load time by **60%**.
- Enhanced UX with **infinite scroll** and **debounced search**, leading to **30% fewer API calls**.
- Achieved **80% unit test coverage**, ensuring stable and regression-free UI components.

Technical Skills

Languages: JavaScript, TypeScript, C++, SQL, GraphQL

Frontend: React, React Native, Next.js, Tailwind CSS

Backend/Cloud: Node.js, Express, MongoDB, PostgreSQL, Redis, Docker, AWS, GCP, Concourse CI, Splunk, Grafana, Git, CI/CD

Education

Bachelors in Computer Science & Engineering

2022 – 2026

Maulana Abul Kalam Azad University of Technology (MAKAUT)

Achievements & Certifications

Verified Discord Bot Developer Badge: Earned for building high-quality Discord bots in 100+ servers, meeting Discord's stringent standards.
