SUMMARY

Motivated and detail-oriented MCA graduate with a strong foundation in computer science principles, database management, and software development life cycle. Proficient in core skills like Python and web development technologies like HTML, CSS, JavaScript, and version control using Git, with hands-on experience in developing academic projects using modern frameworks and tools. Proven ability to collaborate in agile teams, debug code, and deliver reliable solutions. Eager to grow technical skills and contribute to innovative projects.

SKILLS

- Programming Language: Python
- Web Development: HTML, CSS, Javascript, Bootstrap, React Native Basic
- Database: SQL

LANGUAGES

- English
- Tamil
- Telugu

TOOLS

- Visual Studio Code
 - Jupyter notebook
 - Google Collab
-

PROJECTS

Air Quality Index Prediction using Machine Learning | [LINK 1](#)

Jul 2024 – Nov 2024

- Air quality is crucial for human health and ecosystems. This project predicts the Air Quality Index (AQI) using PM2.5 levels and machine learning techniques.
- AQI is a crucial metric for monitoring air pollution and its impact on public health.
- Machine learning algorithms such as SVR, Decision Tree Regressor, and XGBoost Regressor are used to build accurate predictive models by leveraging datasets containing PM2.5 and other air quality metrics.
- Creating a web-based interface for users to visualize and interact with AQI predictions.

Improving Accessibility For The Blind by Developing a Helpful Virtual Assistant For Daily Life | [LINK 2](#)

Jan 2025 – Apr 2025

- In today's fast-evolving digital world, computers have made significant strides. This Python-based voice assistant leverages pyttsx3 and speech recognition to enhance accessibility for visually impaired users.
 - It enables hands-free interaction with digital devices, allowing tasks like email management, web browsing, and application control through voice commands.
 - Offering a cost-effective alternative to expensive assistive tools, the assistant integrates APIs for advanced features such as real-time navigation and personalized experiences.
 - Its modular design ensures scalability, addressing challenges like language limitations and recognition accuracy.
-

AI/ML- INTERNSHIP | [CERTIFICATE LINK](#)

KEJ IT SOLUTIONS PVT LTD, BENGALURU

OCT 2025 - JAN 2026

- Worked as part of the IT team focusing on Artificial Intelligence and Machine Learning processes.
 - Collaborated with team members to understand project requirements and deliver solutions.
 - Maintained professionalism, dedication, and sincerity throughout the internship period.
 - Supported documentation and process flow preparation.
 - Participated in team meetings and knowledge-sharing sessions.
-

EDUCATION

Master of Computer Applications

Vellore Institute of Technology

CGPA : 8.3

2023 - 2025

Bachelor of Computer Applications

Auxilium College Autonomous

CGPA : 7.4

2020- 2023
