SUMMARY

AI/ML Engineer with a strong foundation in Python, Machine Learning, Deep Learning, SQL, and Data Science. Experienced in building, training, evaluating, and deploying machine learning models using TensorFlow, PyTorch, Scikit-learn, Pandas, and NumPy. Hands-on experience in data preprocessing, feature engineering, model evaluation, and deploying AI applications using Hugging Face. Passionate about developing scalable AI solutions and continuously learning modern ML technologies.

SKILLS

Programming Languages: Python, SQL, C, Java

Machine Learning: Scikit-learn, TensorFlow, PyTorch, CNN, Transfer Learning, Deep Learning

Data Science: Pandas, NumPy, Matplotlib, Feature Engineering, Data Preprocessing, EDA, Model Evaluation

Tools: Git, GitHub, VS Code, Google Colab, Jupyter Notebook

Databases: MySQL

Deployment: Hugging Face, Netlify, Streamlit, Flask, REST APIs

PROJECT EXPERIENCE

Image-Based Goat and Sheep Classification using Deep Learning

2026

Python | TensorFlow | Keras | OpenCV | Hugging Face

- Developed an image classification system to distinguish between goats and sheep using Deep Learning.
- Trained and evaluated five deep learning models: **Baseline CNN**, **MobileNet**, **ResNet**, **VGG-16**, and **ConvNeXt**.
- Performed image preprocessing, augmentation, and dataset preparation to improve model performance.
- Compared models using accuracy and prediction metrics, with **ConvNeXt** achieving the highest classification accuracy.
- Deployed the final model on **Hugging Face**, enabling real-time image classification through a web interface.

Digital Cognitive Retraining Platform | Python, Flask, MySQL, React , Netlify

2025

- Designed and developed an AI-enabled cognitive training platform using Flask, React, and MySQL.
- Built backend APIs for storing and processing user performance metrics
- Designed relational databases for efficient data storage and retrieval.
- Processed and analyzed user performance data to generate meaningful cognitive insights.
- Developed dashboards for visualizing user progress and performance trends.
- Deployed on Netlify, enabling secure online access and real-world testing of the application.

EDUCATION

Bachelor of Technology in Computer Science Engineering - AI & ML

Aug 2022 - Jul 2026

Presidency University, Bengaluru, India

- CGPA: 7.65**

Higher Secondary: Science- PCMB

Aug 2020 - Jun 2022

Seshadripuram PU College, Bengaluru, India

- Final Grade: 89.83%**

Secondary School

Seshadripuram High School, Bengaluru, India

- Final Grade: 76%**

CERTIFICATIONS

- Software Engineering Job Simulation | [JPMorgan Chase & Co.](#)
- Front End Development | [Simplilearn](#)
- Java | [CodeChef](#)
- DSA using Python | Scaler
