PROFILE OBJECTIVE

B. Tech graduate in Artificial Intelligence and Machine Learning with a passion for leveraging technology to solve real-world challenges. Seeking an opportunity to apply analytical thinking, adaptability, and a strong learning mindset in a dynamic organization while contributing to business and technology goals.

EDUCATION

- B. Tech – Artificial Intelligence & Machine Learning
(2021-2025) - 8.43 CGPA
Dr. K.V. Subba Reddy Institute of Technology (JNTUA)
- Intermediate (BIEAP) – MPC (2019 – 2021) - 90%
Vijayawada Nalanda Junior College
- SSC (BSEAP) – (2018 – 2019) – 9.7 GPA
The Good Day High School

INTERNSHIP EXPERIENCE

Slash Mark IT Solutions – Machine Learning Intern (Dec 2024 – Apr 2025)

Project: Diabetes AI – Hybrid Predictive System

- Developed a diabetes prediction system using Machine Learning algorithms on a dataset of 100,000 patient records.
- Performed data preprocessing, feature engineering, and risk analysis using health parameters such as BMI, blood glucose, hypertension, and heart disease.
- Achieved 97% prediction accuracy and built a Streamlit-based web application for real-time diabetes risk prediction.

AIML Intern (Virtual) – AICTE Edu Skills (Mar 2025)

Project: Production-Grade GenAI Chat Assistant with RAG

- Developed a Retrieval-Augmented Generation (RAG) based AI assistant using Python and Google Gemini API.
- Implemented semantic search using vector embeddings and cosine similarity for context retrieval
- Built session-based conversational memory for accurate AI-generated responses.

PROJECTS

Detecting Hate Speech in tweets with advanced ML Techniques

- Developed an NLP-based Hate Speech Detection system to classify tweets as Hate Speech, Offensive Language, or Normal Speech using Machine Learning techniques.
- Performed tweet data pre-processing, text cleaning using CountVectorizer, and model training on a dataset of 24,783 tweets.
- Built a Flask-based web application for real-time tweet classification and achieved 90.14% accuracy using Logistic Regression

CERTIFICATIONS

- Machine Learning with Python – IBM
- AI-ML Virtual Internship – AICTE Edu Skills
- Python, Introduction to ML, Explore ML – Infosys Springboard

TECHNICAL SKILLS

Programming Languages

- Python
- JavaScript Fundamentals

AI & Machine Learning

- Prompt Engineering
- Agentic AI
- Generative AI
- Large Language Models (LLMs)
- RAG Concepts

Framework

- Django
