PROFESSIONAL SUMMARY

AI-focused Full-Stack Developer, GenAI Engineer, and Startup Founder with expertise in building scalable web and mobile applications, real-time communication systems, geospatial platforms, and intelligent automation products. Delivered **6+ production systems** using React, React Native, TypeScript, Python, Supabase, PostgreSQL, WebRTC, and LLM technologies including OpenAI GPT-4 and Gemini AI. Proven track record in prompt engineering, NLP pipelines, real-time infrastructures, GIS systems, payment integrations, and full-stack architecture serving **1,000+ users**.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
- **Frontend Development:** React, React Native, Expo, Next.js, Vite, Tailwind CSS, Bootstrap, React Router DOM, Zustand, Jotai, Redux, Framer Motion, Three.js, GSAP, Chart.js, Lucide React
- **Backend Development:** Node.js, Express.js, Flask, REST APIs, WebSockets, Serverless Functions, Edge Functions, Authentication Systems, API Orchestration
- **Databases & Cloud Infrastructure:** PostgreSQL, Supabase, Firebase, MongoDB, SQLite, PostGIS, Supabase Realtime, Supabase Auth, Supabase Storage, Cloudflare Workers
- **AI/ML & NLP:** OpenAI GPT-4o, Gemini AI, Hugging Face Transformers, Prompt Engineering, Generative AI, NLP, Sentiment Analysis, Recommendation Systems, RAG Pipelines, LLM Optimization, AI Chatbots, STT/TTS Systems
- **Realtime Systems & Communication:** WebRTC, Jitsi SDK, WebSockets, Live Presence Systems, Real-Time Messaging, Video Calling Integration, Voice Calling Systems, Push Notifications
- **Security & Authentication:** End-to-End Encryption Concepts, Row Level Security (RLS), JWT Authentication, OAuth, CSRF Protection, Secure API Architectures, HMAC Webhook Verification
- **Payments & Monetization:** Stripe Integration, Razorpay Integration, PayPal Integration, Subscription Systems, Payment Gateway APIs, Webhook Handling
- **GIS & Spatial Intelligence:** Leaflet.js, React Leaflet, OpenStreetMap, Turf.js, GeoJSON, KML, GPX, MapLibre GL, MapTiler, GeoHash Algorithms
- **APIs & Integrations:** OpenAI API, Gemini API, Stripe API, Razorpay API, PayPal API, Spotify API, YouTube Data API, NewsAPI, OpenWeatherMap API, Wikipedia API, Tenor API, Giphy SDK, Google Cloud Translation API
- **Developer Tools & Platforms:** Git, GitHub, Postman, Vercel, Netlify, Expo EAS, Docker (Basics), Linux, VS Code, Cursor, Claude Code, Codex, Figma, Canva
- **Testing, Validation & DevOps:** Zod, ESLint, Prettier, SQLAlchemy, Flask-WTF, Flask-Login, CI/CD Concepts, Performance Optimization, Debugging
- **UI/UX & Design Systems:** Glassmorphism, Responsive Design, Mobile-First Design, Micro-Animations, Design Systems, Figma Prototyping, User-Centered Design

EDUCATION

B.Tech in Artificial Intelligence & Data Science

Vignan Institute of Technology & Science

May 2026

EXPERIENCE

AI Engineering Intern — Sky Rise AI Technologies

2025 – Present

- Spearheaded **6+ AI-native full-stack modules** with real-time systems and intelligent automation workflows, reducing processing latency by **30%** through GenAI engineering practices.
- Forged frontend and backend systems using **React Native, TypeScript, and Flask**, cutting average API response times by **20%** across **12+ endpoints** and improving system scalability.
- Deployed **multimodal language model** integrations serving **500+ daily queries** with **speech recognition**, speech-to-text and text-to-speech pipelines, contextual **conversation orchestration**, and intelligent **suggestion engines**.
- Architected **low-latency peer-to-peer** data transmission layers achieving **sub-100ms** sync with **event-driven publish/subscribe channels** and serverless **edge synchronization** protocols.
- Constructed **pixel-perfect interface systems** across **8+ screen breakpoints** with **utility-first styling**, depth-layered **visual effects**, and modular **design token architectures**.
- Accelerated **AI-native development cycles** by **40%** using **AI coding assistants**, **programmatic API validation** workflows, and **edge deployment pipelines** for production-ready delivery.
- **Tools & Technologies:** React, React Native, TypeScript, Python, Flask, Node.js, Supabase, PostgreSQL, OpenAI API, Gemini AI, WebRTC, Tailwind CSS, Figma, REST APIs, NLP.

PROJECTS

- **IRLYSM – AI-Powered Real-Time Social Networking App**
 - Built a production-grade geosocial platform enabling **proximity-based discovery** across **15+ activity categories**, **instant peer messaging**, and live interactions for **2,000+ daily sessions**.
 - Engineered **horizontally scalable backend infrastructure** supporting **10,000+ concurrent connections** with **geospatial database layers**, serverless **compute functions**, and **row-level access control**.
 - Integrated **sub-second video calling** with **sub-200ms latency** and live **presence signaling** using open-source **conferencing SDKs** and **event-driven broadcast channels**.
 - Developed **interactive map rendering engines** across **3 map providers** with **tile-based cartography**, **spatial**

- indexing algorithms, and real-world coordinate clustering.
- Assembled **premium mobile interfaces** with **60fps fluid gesture mechanics**, **physics-based animations**, and **depth-layered frosted-glass aesthetics** for high-retention user experiences.
- **Tech Stack:** React Native, Expo SDK 54, TypeScript, Supabase, PostgreSQL, PostGIS, WebRTC, Jitsi SDK, Cloudflare Workers, Zustand, Leaflet.js, Stripe, Razorpay, Three.js, Expo AV.
- **SmartStudy AI – AI-Powered Academic Productivity Platform**
 - Conceptualized a **GenAI-enabled academic platform** serving **300+ students** with **autonomous content distillation**, **spaced-repetition card generation**, and **smart note synthesis**.
 - Structured **full-stack monorepo architecture** with **type-safe data contracts** reducing runtime errors by **35%** and **live state synchronization** across **5+ client modules**.
 - Utilized **Google Gemini 2.0 Flash** processing **1,000+ study documents** for **contextual content summarization**, **on-demand quiz synthesis**, and **Feynman-style explanations**.
 - Enforced **secure session handling** for **500+ registered users** with **runtime schema validation** and **atomic state orchestration** across declarative **client-side routing**.
 - **Tech Stack:** React, TypeScript, Vite, Tailwind CSS, Supabase, PostgreSQL, Gemini AI, Jotai, Zod, React Router DOM, Lucide React, PostCSS, REST APIs.
- **Naksha Yojana – Enterprise GIS Intelligence Platform**
 - Launched a **high-performance GIS intelligence suite** processing **50,000+ spatial records** for **spatial data visualization**, **territory analytics**, and **urban infrastructure planning**.
 - Assembled **advanced cartographic pipelines** rendering **10+ map layer types** with **vector overlay rendering** and **geometric computation libraries**.
 - Processed **multi-format geospatial ingestion** across **5+ file formats** supporting **vector feature parsing**, **geospatial data aggregation**, and **real-time layer rendering**.
 - Connected **enterprise-grade spatial warehouses** integrating **3 cloud data platforms** with **columnar analytics engines** for **petabyte-scale geographic query processing**.
 - **Tech Stack:** React 19, Vite 8, Leaflet.js, Turf.js, PostGIS, BigQuery, Snowflake, GeoJSON, Tailwind CSS, Framer Motion, SQL, GIS APIs.
- **Review Scraper AI – NLP-Based Review Intelligence Platform**
 - Shipped a **production AI analytics suite** harvesting **10,000+ app store reviews** and executing **sentiment classification pipelines** at **enterprise-grade throughput**.
 - Provisioned **server-side infrastructure** handling **50+ API routes** with **ORM-driven data persistence**, **lightweight WSGI routing**, and **multi-dialect database compatibility** using **Python 3.11**.
 - Applied **lexicon-based polarity scoring** via **NLTK VADER** across **1,000+ reviews** and harnessed **GPT-4o** for **thematic topic extraction** and **harnessed narrative reports**.
 - Rendered **interactive data dashboards** visualizing **8+ sentiment metrics** with **grid-based responsive layouts**, **3D WebGL visualizations**, and **timeline-based animations**.
 - **Tech Stack:** Python, Flask, SQLAlchemy, SQLite, OpenAI GPT-4o, NLTK, Bootstrap, Chart.js, Three.js, GSAP, Flask-Login, REST APIs.
- **Skill Map AI – AI Career Intelligence & Recommendation System**
 - Spearheaded a **psychometric career intelligence engine** generating **personalized growth roadmaps** for **500+ users** from **aptitude profiling** and **personality trait analytics**.
 - Modeled **RIASEC-based career scoring** across **50+ career tracks** with **Big Five trait weighting**, **multi-factor ranking algorithms**, and **live occupational intelligence feeds**.
 - Visualized **career insight metrics** across **10+ chart types** backed by **secure authentication systems** and **role-based access control**.
 - **Tech Stack:** React 19, Vite 8, TypeScript, Tailwind CSS 4, Chart.js, Supabase, PostgreSQL, jsPDF, html2canvas, REST APIs, AI Recommendation Systems.

CERTIFICATIONS

- Prompt Engineering – Udemy
- Generative AI – Udemy
- Python Programming – Udemy
- Full Stack Web Development – Udemy
- Ethical Hacking – Udemy
- Business Intelligence & Analytics – NPTEL

ACHIEVEMENTS

- **Winner** — HITAM EDC TechSolve among **120+ competing teams** for delivering a **GenAI academic productivity solution** under hackathon constraints.
- **3rd Place** — SketchifyCode Hackathon (**Jijñasa 2025**) for shipping a **live AI-driven application** under competitive **time-boxed conditions**.
- **Shortlisted** for **Google for Startups** from **1,600+ applicants**; showcased MVPs at **IIT Delhi** and **Y Combinator**.
