Objective

MCA student with a strong foundation in software development and problem solving. Seeking to contribute to innovative projects while learning and growing professionally in a dynamic environment.

Education

- **Master of Computer Applications (MCA)**, Mediacaps University 2024-2026 CGPA: 8.38
- **BSc Computer Science**, Deshbandhu College DU 2021-2024 CGPA: 7.59
- **12th**, Govt Model H S School Mahidpur Percentage: 89%
- **10th**, Govt Model H S School Mahidpur Percentage: 89.2%

Skills

- **Programming Languages:** C, C++, and Python
- **Web Technologies:** HTML, CSS, JavaScript, React.js, Node.js, Flask And FASTAPI
- **Other:** Problem Solving, Data Structures, Data Analysis, Artificial Intelligence, LLM/Rag and Machine Learning,
- **Tools:** Vs code, Postman, jupyter, IDLE, MongoDB compass, pgAdmin4 and also Ai tools etc

Experience

- **Full Stack Web Development Intern** — Zaalima Development *April 2025 – Sep 2025*
Contributed to the design, development, and deployment of dynamic web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).
 - Developed responsive and user-friendly UI components in React.js with Tailwind CSS.
 - Built and integrated RESTful APIs for CRUD operations and real-time data handling.
 - Worked on authentication and authorization features using JWT.
 - Collaborated with the team using Git and GitHub for version control.
 - Participated in code reviews and implemented feedback to improve code quality.

Projects

- **Electrical Vehicle Knowledge Bot**
EV Knowledge Bot is an AI-powered application that provides information and guidance about electric vehicles. It uses a Flask backend with a chatbot API and a React frontend for user interaction. The system leverages LLM/RAG techniques to answer queries on EV types, charging, benefits, and maintenance, using a SQLite database for efficient data handling and retrieval.
Github : <https://github.com/Nagorisaifali/Electric-vehicle-knowledge-bot->

- **Turf Booking System**

Turf Management is a full-stack web application that simplifies sports turf booking and management. It enables users to browse available turfs, check schedules, make online reservations, and manage bookings, while administrators can oversee turf availability, bookings, users, and operations through a dedicated dashboard.

Deploy : <https://turfbooking-esth.onrender.com/>

- **Blog Application**

A full-featured blog application built with the MERN stack (MongoDB, Express, React, Node.js) that allows users to write, publish, and manage blog posts. Supports secure user authentication, a rich admin interface, and dynamic content display.

Github : <https://github.com/Nagorisaifali/BlogApplication>

Achievements

- Certified in AI-LLM Role from HCL Tech .
- Secured Second position in Code-a-thon.
