EDUCATION

Indian Institute of Information Technology

Pune

Bachelor of Technology in Electronics and Communications Engineering

Nov 2022 - May 2026

EXPERIENCE

Software Engineer Intern

June 2025 - Present

AI Assistant

Pune

- Built an automated agent QA framework with scripted and LLM-to-LLM test modes and an LLM scoring engine, cutting manual validation time by 60%.
- Improved and scaled a production voice AI calling system, refining agent prompts and qualification logic to reliably handle 200+ automated lead calls per day across multiple telephony providers.
- Integrated and customized the HeyGen live-avatar SDK for real-time talking avatars, decoupling rendering from voice to support both HeyGen's native voice and existing third-party providers, increasing user engagement by 30%

Python Developer Intern

Dec 2024 - Dec 2024

ThirdEye AI

Gurugram

- Developed a machine learning shoplifting detection system using action recognition, improving detection accuracy by 10%
- Implemented a real-time push notification system in Flask using the Web Push API to deliver zone-based vehicle entry alerts, handling up to 100 simultaneous alerts without delay.

HACKATHON EXPERIENCE

Foundrly | Node.js, Express.js, MongoDB, React.js, Google Gemini | [Live Demo](#)

Nov 2025 - Nov 2025

- Built a Node.js, Express, and MongoDB Atlas backend with Socket.io powering real-time swipe, request, match, and chat workflows, scaling to 100 concurrent connections.
- Designed Gemini-powered AI pipelines for idea generation, roasting, and pitch rewriting, orchestrating multi-step prompts with structured output validation.
- Implemented Tinder-style swipe mechanics with Framer Motion, delivering natural, responsive gestures via drag constraints and spring physics.

Kalamitra | NextJs, MongoDB, Firebase, FastAPI, Gemini, Stripe, Docker | [Live Demo](#)

May 2025 - June 2025

- Built a voice-first artisan marketplace using the Web Speech API and Google Gemini to auto-generate listings, cutting listing effort by 80% for non-literate users.
- Integrated Stripe payments, multilingual Gemini generation with Google Cloud Translate, and voice search, enabling 60% faster buyer discovery in MVP testing.
- Built a Gemini-backed helper chatbot and multilingual UI, resolving 30+ user queries in testing.

Semantic Segmentation for Autonomous Vehicles | Python, PyTorch, OpenCV

Jan 2025 - May 2025

- Built a custom DeepLabV3+ (ResNet-50) with dual attention and a custom ASPP head for 32-class urban-scene segmentation on CamVid.
- Benchmarked against U-Net and FPN baselines for the strongest results (77% pixel accuracy, per-class IoU up to 0.88), using augmentation and checkpointing to reduce overfitting.

TECHNICAL SKILLS

Languages: C, C++, Python, Java, SQL

Frameworks: React js, Tailwind, React Native, TensorFlow, Node js, Express js, Material-UI, FastAPI, Flask, PyTorch

Developer Tools: Github, VS Code, PyCharm, Figma, Postgres, Jupyter, Git, Docker

Cloud/Databases: SQL, PostgreSQL, MongoDB

Coursework: DBMS, DSA, OOPs, OS, Machine Learning, Computer Vision, Embedded Systems

ACHIEVEMENTS

Leetcode: Ranked in the top **7.8%** on Leetcode by solving **500+ problems**, max (1791) [Leetcode](#) Ongoing

Kakushin 9.0: Finalist of the Kakushin 9.0 Hackathon Conducted by Nomura (Out of over 500 teams) 2025

ScriptedByHer Hackathon: Finalist for ScriptedByHer Hackthon conducted by Meesho (Top 40 out of over 50000 participants) 2025

NEST Hackathon: Semi Finalist for NEST Hackthon conducted by Novartis (out of over 6000 teams) 2025
