

Vivek Shekhawat

Software Engineer | Backend, AI and Full-Stack Systems

Jaipur, India | +91-7734911626 | vivekshekhawatofficial1592002@gmail.com
github.com/Vivek1592002 | linkedin.com/in/vivek-shekhawat-567308250

PROFESSIONAL SUMMARY

Software Engineer with 1+ year of experience building backend, AI, web and mobile products. Strong in Go, Python, PostgreSQL, RAG/LLM pipelines, REST APIs and React, with hands-on experience designing secure concurrent services and shipping production-facing applications.

TECHNICAL SKILLS

Languages: Go, Python, JavaScript, Java, C++, SQL
Backend & AI: Gin, GORM, Django, Node.js, Express.js, LangChain, LangGraph, RAG, LLMs, Ollama, REST APIs, SSE, JWT
Frontend: React.js, Next.js, React Native, Chart.js
Data: PostgreSQL, pgvector, MySQL, vector search
Cloud & Tools: OpenStack (Nova, Neutron, Keystone, Glance, Cinder, Swift), Git, GitHub, Postman, Firebase
Concepts: Data structures, OOP, concurrency, RBAC, API design, asynchronous processing, system design

EXPERIENCE

Auriga IT

Jaipur, India

Associate Software Engineer

Feb 2025 – Present

- Built a production-oriented RAG platform in Go using Gin, GORM, PostgreSQL, pgvector and Ollama to ingest webpages, PDFs and text, generate embeddings, retrieve relevant chunks and answer source-grounded questions.
- Designed asynchronous document processing and bounded concurrent embedding pipelines using goroutines, WaitGroups and semaphores; added batch persistence and SSE-based response streaming.
- Implemented secure multi-user APIs with JWT access/refresh flows, token blacklisting, RBAC, ownership checks, rate limiting, SSRF-safe URL validation, request-size limits, recovery middleware and structured logging.
- Delivered React Native, React.js and Next.js features, integrated REST APIs and collaborated across teams to debug issues, improve performance and ship maintainable product functionality.

Kanwat Infotech Pvt. Ltd.

Jaipur, India

Software Development Intern

Jun 2024 – Aug 2024

- Built reusable React Native components and cross-platform mobile features from product requirements.
- Integrated backend APIs, handled asynchronous UI states and resolved functional and interface defects.

SELECTED PROJECTS

Timesheet Bot

Python, LangChain, LangGraph, LLMs

- Developed a conversational assistant that translates natural-language requests into create, read, update and delete operations for employee timesheets.
- Orchestrated multi-step workflows with LangGraph and automated task classification and time allocation to reduce repetitive manual entry.

RecoBee Product Suite

React Native, React.js, Next.js, Chart.js

- Built and shipped a movie-recommendation Android application and led development of responsive web products with dynamic data visualization, API integration and production debugging.
- Live: Google Play | recobee.ai | reco-bee.com

EDUCATION

Swami Keshvanand Institute of Technology, Management & Gramothan (SKIT)

Jaipur, India

B.Tech. in Information Technology

2021 – 2025 | CGPA: 9.14/10
