Summary

Full Stack Developer with hands-on experience in developing scalable web and mobile applications using Node.js, Express.js, PostgreSQL, React.js, and React Native. Proficient in building RESTful APIs, backend optimization, frontend integration, and Google Cloud Platform. Experienced in authentication systems, database design, caching strategies, and delivering production-ready applications with focus on performance and reliability.

Education

Jaipur Engineering College And Research Center, Jaipur

Bachelor in Technology (Computer Science)

2020 - 2024

CGPA - 8.15

DAV Centenary Public School, Jaipur

Senior Secondary (PCM)

2019 - 2020

Percentage - 70.4

Skills

Frontend React, React Native, Javascript, TailwindCSS, HTML5, CSS3

Backend Node.js, Express.js, REST APIs, Nest.js

Databases PostgreSQL, MongoDB, Redis

Tools Git, GitHub, Postman, Jira, Zoho, Jenkins

Testing Playwright

Experience

Concret.io

Associate Developer

Sept 2025 - Present

Jaipur

- Integrated Google Cloud Cloud Storage buckets for secure file upload, retrieval, and document management, enabling scalable cloud-based asset handling across applications.
- Designed and implemented authentication flows and session management, including login validation, token handling, refresh-token lifecycle, and secure access control for web/mobile applications.
- Contributed to cross-platform mobile application development, implementing production-ready features, API integrations, and responsive UI workflows for improved user experience..
- Enforced database-level authorization through Row-Level Security (RLS) to protect sensitive multi-user data access.

Akeo Technologies

Software Engineer

March 2025 - July 2025

Jaipur

- Developed and maintained end-to-end ERP platform features using Angular and Nest.js, ensuring high performance and scalability .
- Managed complex PostgreSQL database schemas with optimized queries to handle high-volume inventory data
- Build Scalable RESTful APIs for business modules, enhancing system integration and performance.

Osfin.ai

Automation Engineer

Sept 2024 - Feb 2025

Bangalore

- Developed and executed end-to-end automation test scripts using playwright and node.js, increasing test coverages from 30% to 80%.
- Integrated automated test runs into the CI/CD pipeline, enabling fast feedback on every pull request and reducing manual QA effort.
- Monitored and analyzed test failures and flakiness, driving fixes and stability improvements in both test code and application code.

Projects

StrataHire SaaS Hiring Platform

Node.js, PostgreSQL, React.js, Google Cloud bucket

- SaaS recruitment platform streamlining end-to-end hiring workflows for staffing agencies and internal HR teams.
- Implemented scalable React/Node.js features such as candidate pipelines, job posting management, and interview tracking, improving recruiter productivity and reducing manual work.
- Optimized database queries and API design for high-volume candidate and job data, improving key pages' load times and overall platform responsiveness.
