OBJECTIVES

Results-driven Python Developer and AI & Data Science fresher with hands-on experience in Python, Django, SQL, Docker, and Jenkins. Skilled in building data pipelines, machine learning models, and web applications. Experienced in OOP principles, REST API development, and Agile workflows. Seeking an entry-level Python Developer role to contribute to scalable, data-driven solutions.

SKILLS

Programming Language
Python, SQL, Java and R programming(Basic)

Frameworks & Libraries
Django, NumPy, Pandas, Streamlit, Scikit-learn

Tools
GITHUB, DOCKER, JENKINS, VS code

Database
PostgreSQL

EXPERIENCE

Python Developer Intern 09/2023 – 10/2023
Octanet Services Pvt Ltd Remote

- Developed a console-based ATM system using Python, implementing OOP principles including classes, inheritance, and encapsulation.
- Applied modular design and algorithmic thinking to implement core banking transactions such as deposit, withdrawal, and balance inquiry.
- Collaborated with the team in an Agile development environment, following sprint-based task delivery.
- Wrote clean, reusable Python code following industry best practices for readability and maintainability.

PROJECTS

Property Management System for LandLords 07/2023 – 09/2023
Github, Docker, Jenkins

- Designed and developed a full-stack web application using Django REST framework to manage land and landlord records.
- Implemented user authentication, property listing, and online communication features for buyers, brokers, and landowners.
- Containerized the application with Docker and set up Jenkins pipeline for automated deployment.
- Reduced manual coordination in land transactions by centralizing real estate data on a single platform.

Uber Ride Analysis 04/2023 – 04/2023
R Programming (Rshiny)

- Analyzed large-scale Uber ride datasets to extract insights on daily, monthly, and yearly trip patterns.
- Built interactive RShiny dashboards to visualize pickup/drop trends, driver performance, and ride metrics per km/mile.
- Identified customer demand trends and cab service growth patterns to support business decision-making.

Waste Image Classification 03/2023 – 04/2023
Deep Learning and Streamlit

- Developed a Convolutional Neural Network (CNN) model to classify drainage waste images as recyclable or non-recyclable with high accuracy.
- Built an end-to-end image prediction pipeline using Python and Deep Learning frameworks.
- Deployed the application on Streamlit, enabling real-time waste classification for garbage monitoring use cases.

EDUCATION

B.TECH ARTIFICIAL INTELLIGENCE AND DATA SCIENCE 2021 – 2025
Karpagam College of Engineering, Coimbatore
CGPA 6.3

HIGHER SECONDARY SCHOOL 2020 – 2021
Laurel Higher Secondary School, Pattukkottai
PERCENTAGE 75%

SECONDARY SCHOOL 2018 – 2019
Laurel Higher Secondary School, Pattukkottai
PERCENTAGE 70%
