

VISHWAS BADIGER

Aspiring Software Developer (Java | Spring Boot | React.js)

Gokak, Belagavi, Karnataka | +91 8951128986 | Vishwasbadiger240@gmail.com

[LinkedIn](#) | [Portfolio](#)

SUMMARY

Aspiring Software Developer with hands-on project and internship experience building REST APIs and web applications using Java, Spring Boot, React.js, Node.js, and MySQL. Contributed to an e-commerce platform that lifted user engagement 40% and cut API response time 30%, and completed an intensive Capgemini-sponsored Java Fullstack program. Eager to bring strong fundamentals in clean code, agile practices, and full-stack problem-solving to an entry-level Software Developer role.

Key Achievements: 40% ↑ user engagement (e-commerce platform) • 30% ↓ API response time • 85% ML model accuracy • 405-hr Capgemini Java program

SKILLS

Languages: Java, JavaScript, Python, C++

Backend: Spring Boot, Node.js, REST APIs, Flask, PHP

Frontend: React.js, HTML, CSS

Databases: MySQL, MongoDB

Tools & Practices: Git, JWT/OAuth 2.0, Agile, Debugging

WORK EXPERIENCE

Java Fullstack Developer Trainee — Edubridge Digital Academy

Jan 2025 – Jun 2025

- Completed a 405-hour Capgemini-sponsored Java Fullstack Development Program covering Java, Spring Boot, React.js, MySQL, REST APIs, and Agile methodologies.
- Designed and deployed full-stack web applications end-to-end, from database schema design through UI implementation.
- Collaborated in team-based projects using Git for version control, strengthening debugging and code-review practices.

Fullstack Web Development Intern — Skillzam

Jun 2024 – Jul 2024

- Delivered a full-stack e-commerce platform, driving a 40% increase in user engagement.
- Engineered responsive frontend components in React.js and backend services in Node.js and MySQL.
- Optimized database queries and API logic, cutting average response time by 30%.
- Implemented secure authentication and authorization using JWT and OAuth 2.0.
- Partnered with UI/UX designers to improve accessibility and overall customer experience.

PROJECTS

Soil Classification for Sustainable Agriculture — Python, Flask, Scikit-learn

Jan 2024 – Jun 2024

- Engineered a machine learning web application that classifies soil types based on key engineering properties (texture, pH, moisture content, and composition), helping farmers and agronomists make faster, data-driven decisions.
- Preprocessed and cleaned raw soil datasets, handling missing values and normalizing features to improve model reliability.
- Trained and evaluated multiple Scikit-learn classification models, tuning hyperparameters to reach 85% prediction accuracy.
- Built a Flask-based web interface allowing users to input soil parameters and instantly view predicted soil type and recommendations.
- Deployed the end-to-end pipeline, connecting the trained model to the web frontend for real-time inference.

Event Management System — Full-Stack Web App

Jun 2023 – Nov 2023

- Built a full-stack web portal for college event organizers to create, publish, and manage event listings including schedules, venues, and capacity limits.
- Designed a participant-facing registration flow allowing students to browse events and register online, reducing manual paperwork.
- Architected the database schema to manage events, participants, and registration records, ensuring data consistency across modules.
- Integrated frontend and backend end-to-end, connecting UI forms to backend APIs and the database.

CERTIFICATIONS

- Java Full Stack Development — Edubridge Digital Academy
- Cloud Computing (Elite, 68%) — NPTEL / IIT Kharagpur
- Privacy & Security in Online Social Media — NPTEL

EDUCATION

B.E., Information Science and Engineering — Basaveshwar Engineering College, Bagalkot 2024

Associate Degree, Science — Poorna PU College, Dharwad 2020

High School — Mayur School, Gokak 2018
