WORK EXPERIENCE

LUNACAL.AI (AI Scheduling SaaS with a highly successful [AppSumo](#) launch)

[lunacal.ai](#) | Bangalore, KA

(Full Time) Sep 2025 - Present

Software Developer Intern

- Built complete **CI/testing infrastructure** and a **LaunchDarkly-style production rollout system**, enabling safe beta releases, deterministic percentage rollouts, **kill switches**, and instant rollback for backend and UI features across the production **Next.js** + **NestJS** + **tRPC** stack, integrated with GitHub Actions, Vitest, and Playwright.
- Designed and implemented the **SMS subsystem** using **QStash** + **Redis/Upstash**, supporting delayed scheduling, delivery tracking, webhook logging, retry-aware execution, and **credit-based billing** across Azure-hosted services.
- Shipped Lunacal's **AI calling infrastructure for meetings** by integrating agent execution into the core scheduling platform, building **credit accounting**, webhook pipelines, structured logging, and **parallelized meeting orchestration**; also built observability with **Elasticsearch** + **Kibana** across scheduling, communication, and agent workflows.
- Automated **custom domain provisioning on Azure**, replacing a manual workflow that took multiple days with a self-serve system for **DNS CNAME/TXT verification**, SSL certificate provisioning and binding, Azure App Service domain attachment, and Azure Front Door routing, reducing activation time from **days to ~30 minutes**.
- Built internal SaaS platform tooling across **billing, media, and scheduled workloads**, including entitlement audits for downgraded/refunded users, a **Sharp** + **WebP** + **Azure Blob** image optimization pipeline with multiple asset variants, and migration of GitHub Actions cron jobs to a dedicated scheduler with **retries and failure visibility**.

LU DOTRONICS (Tech company founded by IIT Bhubaneswar alumni)

[ludotronics.io](#) | Bhubaneswar, OD

(Part-time) Jun 2025 - Sep 2025

Software Developer

- Built **PayEvenly**, a Splitwise-style React Native app for India with in-app payment checks, **AI voice input**, AI receipt parsing, FastAPI + SQLite backend, and Expo Cloud CI/CD, reducing split creation time by **~45%**.

EXPERT BUDDY (Ed-tech platform used by 200,000+ students)

[expertbuddy.com](#) | Jaipur, RJ

(Full Time) Apr 2025 - Sep 2025

Next.js Frontend Developer Intern

- Developed **StudyBank** feature with **Next.js** + **SSR**, migrating auth from client-side to secure cookie-based SSR, eliminating UI flicker and raising Lighthouse scores from **~45 to 85+**.
- Implemented custom caching for **auth state, wallet balances, and notifications**, reducing redundant network calls by **~30%** and improving overall load times.
- Built **AI-powered learning features**, including **ExpertBuddy AI** with agentic chat for homework queries, reducing resolution time by **42%**, and developed a **generative AI PDF analysis system** using **Vercel AI SDK** that processed **100+ page documents in <5s**, converting content into structured formats and reducing manual form entry by **38%**.
- Improved engagement and discoverability by implementing **chat and real-time notifications (TalkJS + WhatsApp/Gupshup)**, reworking landing page UX for first-time visitors (**reducing bounce rate by 17%**), and migrating critical pages to **server-side fetching**, increasing SEO crawlability and driving a **23% increase in organic traffic**.

ACHIEVEMENTS & OPEN SOURCE

SMART INDIA HACKATHON 2024 WINNER

Mohali, PB | Dec 2024

- Developed Mentor Map, an AI-driven career guidance platform that won Smart India Hackathon 2024 among 80,000+ teams nationwide, receiving ₹100,000 (~\$1,200 USD) and recognition from Dr. Sanjeev (Joint Director, C-DAC Mohali).

OPEN SOURCE CONTRIBUTOR (1700+ STARS)

- Enhanced **MetaCall's developer tooling** by building a **TypeScript + VS Code API IntelliSense feature**, improving editor support for developers working with multi-language function calls across the polyglot runtime.

PROJECTS

Construct IDE (Electron, LangGraph, OpenAI, Prisma, PostgreSQL, Turborepo)

Mar 2026 - Present | [Live Link](#) | [Source Code](#)

- Building an AI-native teaching IDE that converts project goals into a personalized coding workspace with generated lessons, concept checks, implementation tasks, hidden tests, in-editor tutoring, persistent learner state, and session continuity across project steps.

Decipath AI (Next.js, TypeScript, ShadCN UI, OpenAI API, React Flow)

Jan 2025 - Mar 2025 | [Live Link](#) | [Source Code](#)

- Built a full-stack **AI roadmap-generation SaaS** where an agent searches the web, grounds context, and generates structured roadmap graphs through React Flow using custom layout logic and path-optimization algorithms for coherent flow generation.

XiteCoin Blockchain (Python – no external dependencies)

Jan 2024 - Jun 2024 | [Source Code](#)

- Created a **pure Python blockchain** with custom proof-of-work, gossip-based peer-to-peer networking, Merkle validation, transaction handling, and a JSON-RPC node interface.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python

Frontend & Full-Stack: Next.js, React, React Native, Node.js, NestJS, Electron

AI Engineering: OpenAI API, Vercel AI SDK, LangGraph, RAG, agentic workflows

Databases & Infra: PostgreSQL, Prisma ORM, Redis, QStash, Azure, Vercel

Engineering Tools: GitHub Actions, Playwright, Sentry, Elasticsearch/Kibana, Turborepo

EDUCATION

ABES Engineering College, Ghaziabad, UP — **Bachelor of Technology in Computer Science** (2023 - 2027)
