Chennai, Tamil Nadu, India | +91 9790220161 | gayathri.2842004@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Engineer and BE Computer Science graduate with strong React.js fundamentals — component architecture, hooks, and state management — built through four independently designed, developed, and deployed applications, all live on Vercel with GitHub-integrated CI/CD. Working proficiency in Python from academic and internship coursework, alongside production experience in Node.js/Express.js, REST APIs, and both MongoDB and MySQL. Comfortable with Git-based workflows and shipping real, working software end-to-end rather than prototypes. Actively uses AI-assisted coding tools (Copilot-class assistants) in daily development, backed by a Microsoft-powered AI Full Stack Developer certification. Strong software fundamentals and a consistent pattern of self-directed learning — genuinely curious about extending that into new backend ecosystems and AI-native engineering.

CORE COMPETENCIES

React.js (Hooks, State Management) • Git & Shipping Deployed Software • Python Fundamentals • Node.js & REST APIs • SQL & NoSQL Databases • AI-Assisted Development • Debugging & Problem Solving • Self-Directed Learning

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java

Frontend: React.js (Components, Props, State, Hooks), HTML5, CSS3, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, RESTful API Development, JWT Authentication

Databases: MongoDB (Schema Design, CRUD), Mongoose, MySQL

CS Fundamentals: Object-Oriented Programming, Data Structures, Algorithms, Problem Solving

Tools & Practices: Git, GitHub, npm, Postman, VS Code, Vite, Code Reviews, Debugging & Testing, SDLC

Deployment & CI/CD: Continuous Deployment via Vercel (GitHub-integrated auto-build/deploy pipeline)

EXPERIENCE

Full Stack Developer Intern — Futrik Technologies

Madurai, Tamil Nadu | Apr 2025 – Jun 2025

- Built responsive, multi-tier user interfaces for an online recipe web application using React.js, HTML5, CSS3, JavaScript, and Python.
- Applied object-oriented and modular design principles to implement frontend features supporting core application workflows.
- Participated in SDLC activities — design discussions, coding, code reviews, testing, and debugging — to write clean, maintainable code and support application quality and validation.
- Collaborated with a five-member engineering team using Git for version control, contributing to complex feature implementation under evolving requirements.

PROJECTS

SecureRide-AI — MERN Car Booking Platform

React.js, Node.js, Express.js, MongoDB, Mongoose, JWT, JavaScript, HTML5, CSS3, Git/GitHub

- Designed and developed a full-stack, multi-tier car booking platform with a customer-facing booking flow and an administrative dashboard.
- Implemented secure REST APIs, JWT authentication, and role-based authorization; tested and validated core booking workflows.

Live Demo: <https://secure-ride-ai.vercel.app/>

AskSky — Weather Forecast Application

React.js, JavaScript, Vite, OpenWeather API, HTML5, CSS3, Git/GitHub

- Built a responsive weather forecasting app consuming the OpenWeather REST API for current conditions and a five-day forecast.
- Implemented error handling and loading states to keep the UI reliable under inconsistent network conditions.

Live Demo: <https://weather-forecast-app-three-neon.vercel.app/>

Developer Portfolio

React, TypeScript, Tailwind CSS, Vite, Framer Motion, Git/GitHub

- Built a production-grade portfolio site with a component-driven React + TypeScript architecture, theming, and animated UI using Framer Motion.

Live Demo: <https://gayathripalraj-portfolio.vercel.app/>

TasteHub — Online Food Ordering Application

HTML5, CSS3, JavaScript, Bootstrap, Fetch API, Local Storage, JSON

- Built a responsive food ordering app with dynamic menu loading, cart functionality, checkout validation, and simulated order tracking.

Live Demo: <https://online-food-order-application.vercel.app/>

EDUCATION

Bachelor of Engineering, Computer Science and Engineering

RVS School of Engineering and Technology, Dindigul | 2021 – 2025 | CGPA: 8.3/10

CERTIFICATIONS

- AI-Powered Full Stack Developer Program — Simplilearn, powered by Microsoft (2026)
- Developing a Reliable Back-End with Node.js and Express — Simplilearn (2026)
- FSD: Foundations of Front-End Development — Simplilearn (Jun 2026)
