

SHREYA CHAUHAN

+91-8218450097 chauhanshreya140@gmail.com [LinkedIn](#) [GitHub](#) [LeetCode](#)

Technical Skills

Languages: Java, C++, Python, JavaScript, SQL
Frontend: React.js, Redux, Bootstrap, Tailwind CSS, HTML5, CSS3
Backend: Spring Boot, Node.js, Express.js, REST APIs, Apache Kafka
Databases: MySQL, MongoDB, Redis
Messaging & Resilience: Apache Kafka, Circuit Breaker (Resilience4j), Idempotency Patterns
DevOps & Tools: Git, GitHub, Postman, Maven, VS Code, IntelliJ IDEA
Core CS: Data Structures, Algorithms, OOP, System Design, DBMS, Operating Systems

Experience

Tata Consultancy Services (TCS)

April 2025 – Present

Assistant System Engineer

India

- Contributed to **GeM (Government e-Marketplace)** — a highly scalable **microservices-based platform** built with **Spring Boot** and **React.js**, where independent services (payment, bid, forward auction, seller) communicate via **REST APIs** and **Apache Kafka** event streams for loose coupling and high throughput.
- Implemented **Circuit Breaker** patterns (Resilience4j) to prevent cascading failures — temporarily blocking calls to failing downstream services with fallback responses, combined with **retry logic** and **Redis caching** to improve system latency and resilience.
- Engineered a high-reliability **payments module** with **idempotency guarantees** ensuring exactly-once transaction processing despite retries; integrated payment gateway with **encryption**, **tokenization**, and **audit logging** for compliance and transactional integrity.
- Built asynchronous **Kafka-driven event flows** for payment confirmations and downstream order updates; implemented **reconciliation pipelines** and monitoring to ensure correctness at scale.

Invoxico Technologies

Aug 2024 – Jan 2025

Software Development Engineer Intern

India

- Built and maintained scalable **React.js** frontend components with a focus on **reusability and performance** — implemented **lazy loading and code splitting** to reduce initial bundle size and improve page load times.
- Integrated **RESTful APIs** into the frontend with proper **error handling**, **loading states**, and **optimistic UI updates**; collaborated with backend teams to define API contracts and streamline data flow.
- Refactored existing components to follow **DRY principles** and introduced a shared component library, reducing UI inconsistencies and cutting redundant code across multiple product modules.

Projects

Property Hub | *MongoDB, Express.js, React.js, Node.js, Redux, GoogleOAuth, JWT*

- Built a **full-stack real estate marketplace** on the **MERN** stack supporting property listing, buying, renting, and leasing workflows with **role-based access control** for buyers and sellers.
- Implemented **Google OAuth** and **JWT-based authentication**; engineered **advanced search and filtering** by location, price, and property type with server-side pagination for scalable data retrieval.
- Designed a **real-time messaging system** between buyers and sellers using **WebSockets**; structured **RESTful APIs** with Express.js and a normalized MongoDB schema to handle complex property-user relationships.

BudgetBuddy | *MongoDB, Express.js, React.js, Node.js, Redux, JWT Authentication, Bootstrap*

- Developed a **personal finance management platform** with modules for **expense tracking**, **budget planning**, **category-wise analysis**, and monthly reporting — built on a **REST API** backend with **JWT-secured** endpoints.
- Managed global state with **Redux** for seamless data flow across expense, budget, and report views; designed a **responsive UI** with Bootstrap and custom CSS for intuitive financial data visualization.
- Implemented **aggregation pipelines** in MongoDB to generate per-category and monthly spending breakdowns, enabling users to identify overspending patterns and make data-driven budget decisions.

Certificates & Achievements

- Global Rank 386** — CodeChef Starters 105 Division 3 (Rated) out of **12,000 participants**.
- Solved **300+** problems across LeetCode and CodeChef spanning arrays, trees, graphs, DP, and greedy algorithms.
- Certificate:** Java In-Depth — Udemy | **Certificate:** Introduction to Programming in C — NPTEL

Education

SRM Institute of Science & Technology

2020 – 2024

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.3/10.0

Vivekanand School

2019 – 2020

XIIth Standard

Percentage: 77.6/100
