SUMMARY

Software Engineer with 1 year of Software Engineering internship experience developing Python-based backend services, AI - powered applications, and LLM integrations. Skilled in full-stack development, REST APIs, workflow automation, Docker, CI/CD, and scalable software design.

EXPERIENCE

Software Engineer Intern

SEQUOIA

April 2025 - March 2026

- Secured 1st place in Sequoia AI Hackathon by automating 40+ user workflows, building an AI-driven system.
- Built a centralized validation framework across 8+ repositories, including migration from Selenium to Playwright.
- Engineered automation for 30+ REST APIs and 300+ UI workflows, improving reliability and coverage.
- Owned and resolved cross-repository production issues.
- Integrated CI/CD pipelines (Jenkins, Docker) and automated backend workflows using AI tools (Cursor, LLMs).

PROJECTS

Automated Evaluation System (AutoEval) | React.js, Next.js, Django, FastAPI, PostgreSQL

https://github.com/Pavani-A/Auto_Eval

- Developed a full-stack AI-powered automated evaluation system with role-based access for students, faculty, and administrators across 4+ modules.
- Built a React.js (Next.js) frontend integrated with Django/FastAPI REST APIs.
- Integrated LLaMA for automated evaluation and personalized feedback generation.

Pantry Management | Python, Django, Mysql, HTML/CSS, JavaScript

<https://github.com/Pavani-A/pantry-management>

- Built a full-stack pantry management app with authentication and CRUD across 4+ modules.
- Implemented multi-user data isolation and an expiry tracking system for dynamic item lifecycle management.
- Integrated MealDB API to generate ingredient-based recipe recommendations (20+ recipes).

Handwritten Digit Recognition | Python, TensorFlow, CNN, Tkinter

<https://github.com/Pavani-A/handwritten-number-recognition>

- Built a CNN-based handwritten digit recognition model using the MNIST dataset (60K+ images).
- Developed a Tkinter GUI enabling real-time digit input and integrated end-to-end prediction workflow.
- Preprocessed image data and enabled classification across 10-digit classes (0–9) with consistent performance.

EDUCATION

Bachelor of Engineering – Computer Science and Engineering

New Horizon College of Engineering • Bengaluru, Karnataka • 2022-2026 • CGPA - 9.71

CERTIFICATIONS

Cloud Computing (Elite Silver, Top 5%) - NPTEL, Generative AI in Action - IBM, Google Data Analytics Certificate

SKILLS

Python, Java, SQL | TensorFlow, Keras, Scikit-learn, Pandas, NumPy | Machine Learning, Deep Learning, CNNs | Django, FastAPI, Flask | REST APIs | MySQL, MongoDB | Git, GitHub, Docker, Jenkins, CI/CD | HTML, CSS, JavaScript

INVOLVEMENT

Pratidhi Mentorship Program Mentee

COMMVAULT • September 2024 - October 2024

Completed a 2-month mentorship program at Commvault covering Python, cloud computing, operating systems, and scalable systems, with hands-on learning and collaborative sessions

DATA STRUCTURES & ALGORITHM

Solved 200+ problems on LeetCode covering key data structures and algorithms with a focus on optimized solutions and complexity analysis
