

RAJ THUMAR

thumarraj999@gmail.com | +91 9104382983

EDUCATION

Bachelor of Technology, Information Technology

Dharmsinh Desai University, Gujarat

CPI : 8.6

July 2019 – May 2023

EXPERIENCE

Blobstation

Software Engineer(Nodejs, NestJS, ASP.NET Core, ReactJS, AWS)

Ahmedabad, India

April 2024 - Present

- Developed and maintained scalable backend services using **Node.js, NestJS, and ASP.NET Core**, delivering high-performance REST APIs and background workers in microservice-based architectures. Built a scalable **multi-tenant architecture** enabling efficient tenant isolation.
- Built AI-powered workflow automation by integrating **OpenAI, Gemini, RAG, and MCP** into backend services for intelligent workflow execution.
- Configured **Apache Kafka**-based event-driven architecture for scalable operational workflows, real-time notifications, and asynchronous background processing.
- Built **Redis** for caching and background jobs, and implemented SMTP-based email services for automated notifications.
- Configured Microsoft Teams integration using Microsoft Graph API and webhooks, automating workflow notifications and improving team collaboration.
- Engineered secure payment infrastructure with **Stripe** webhooks and **Apple Pay** integration, supporting one-time and subscription billing.
- Contributed to frontend development using **React.js** and **Material-UI (MUI)**, delivering responsive end-to-end features.

eDelta Enterprise Solution

Full-stack Developer(NodeJS, ExpressJS, GraphQL, ReactJS)

Ahmedabad, India

July 2023 - Jan 2024

- Developed a real-time webinar streaming platform using Node.js, Express, GraphQL, and React.js, enabling live sessions.
- Built a broadcast messaging system for WhatsApp and SMS, integrating chatbot automation to improve customer engagement.

Crest Data

SDE Intern (Python, Flask, Phantom, Splunk SOAR System)

Ahmedabad, India

Dec 2022 - June 2023

- Developed ServiceNow integrations for SOAR (Phantom), implementing investigative and automation actions for digital workflow management.
- Automated ServiceNow workflows, improving operational efficiency.

PROJECTS

AI Workflow Orchestration Engine(NestJS, Apache Kafka, PostgreSQL, Redis, OpenAI, Gemini):

- Built a distributed AI workflow engine to execute multi-step LLM pipelines using event-driven architecture.
- Integrated **OpenAI, Gemini, and RAG** for context-aware AI workflows.
- Designed asynchronous job processing using **Apache Kafka** and **Redis** for scalable AI tasks.
- Developed reusable AI workflow components with **MCP** integration, scheduling, retries, and execution monitoring.

SM (Multitenant Subscription Management|ASP.NET Core,ReactJS, PostgreSQL, Stripe):

- Built a multi-tenant B2B subscription management platform supporting diverse client subscriptions on a single scalable platform. Enabled tenant onboarding with product/feature registration to support recurring and one-time subscription plans.
- Implemented SSO authentication (Google, Microsoft, Apple) along with a custom ID token flow, enhancing security and providing seamless access across tenants.
- Developed event-driven architecture for notifications and operational events. Integrated Stripe payments for secure recurring and one-time billing with product and plan synchronization.

SKILLS

Programming C++ , C, JavaScript, TypeScript, C#
Frameworks NodeJS, NestJS, ExpressJS, ASP.NET, ReactJS
AI RAG, MCP, LLM Integration
Databases PostgreSQL, MySQL, MongoDB, Redis
DevOps Docker, AWS S3, EC2, ElastikBeanStalk, GitHub Actions

EXTRA CURRICULAR ACTIVITIES

Activities: LeetCode, CodeChef , HackerRank
