WORK EXPERIENCE

Mantra Technologies

Software Engineer

Jan 2024 – Present
Hyderabad, Telangana

Designed, built, and shipped four production AI SaaS platforms spanning AI customer support, website agents, component intelligence, and algorithmic trading — with CI/CD pipelines (GitHub Actions), Docker containerization, and pytest test suites.

IMPACT HIGHLIGHTS

- 2M+ AI conversations served across platforms with sub-200ms streaming latency
- End-to-end ownership of 4 multi-tenant SaaS backends — architecture, CI/CD, observability, and deployment

500Agents — Component Intelligence Platform

- Architected the FastAPI AI runtime for a Component Intelligence Platform — Journey Builder, Component Registry, MCP-based data source integrations — enabling deployment of conversational AI agents with dynamic UI rendering.
- Engineered SSE streaming with LLM-powered intent resolution and multi-provider routing via LiteLLM, Langchain, Langgraph, session persistence, and S3-backed component publishing — 2M+ conversations at sub-200ms latency.

Jug.ai — AI Website Agent Platform

- Shipped a full-stack AI website agent platform: automated web crawling, content training pipeline, and one-click deployment of live chatbots & voice agents with embeddable widget — deployed on Docker + DigitalOcean.
- Developed real-time intent detection engine with dynamic content personalization, AI-to-human handoff with full context transfer, and multi-language voice chat — improving visitor engagement.

Support.cc — AI Customer Support Platform

- Engineered AI-powered customer support platform: automated ticket triage, AI email draft generation, knowledge base management, and real-time CSAT analytics dashboard — reducing manual triage overhead.

TheAIBull.com — AI-Powered Trading Platform

- Delivered a full-stack AI trading platform: visual Strategy Builder for multi-leg options, real-time Options Chain (Greeks, Open Interest), Stock Screener, P&L tracking, and backtesting engine with one-click live deployment.
- Developed 24/7 automated AI trading agents integrated with 7 Indian brokerages (Zerodha, Dhan, AngelOne, 5paisa, Shoonya, etc.) via secure broker APIs — with sentiment analysis, risk management, and news-based signals.

PROJECTS

Sasta Signals — Multi-Platform Price Tracking & Alerts [GitHub](#)

- Architected a distributed price monitoring system across 7 major Indian e-commerce platforms (Instamart, BigBasket, Blinkit, Zepto, Amazon Fresh, Flipkart Grocery, Meesho) with automated web scraping via Playwright — tracking 100+ product categories with location-based alerts.
- Implemented real-time price drop detection with Telegram & email notifications, 20+ RESTful API endpoints, and CI/CD pipeline (GitHub Actions) — deployed on DigitalOcean with Docker + Nginx reverse proxy.

PROFESSIONAL SUMMARY

Software Engineer with 2.5+ years of experience designing and building production-scale AI SaaS platforms from architecture through deployment. Specializes in scalable backend systems, LLM applications, RAG pipelines, real-time streaming APIs, and AI agent orchestration using Python, FastAPI, MongoDB, React, and Next.js. Strong focus on REST API design, asynchronous processing, CI/CD with GitHub Actions, Docker-based deployments, automated testing with pytest, and production observability.

TECHNICAL SKILLS

LANGUAGES

Python, JavaScript, TypeScript, Java, SQL

BACKEND & APIS

FastAPI, Node.js, Express, REST API Design, Async Programming, Background Workers, SSE, WebSockets, Socket.io

AI / ML

LangChain, LangGraph, LiteLLM, OpenAI API, RAG Pipelines, AI Agents, Tool & Function Calling, MCP, Vector Search, Embeddings, Semantic Search, Qdrant, Hugging Face, NumPy, Pandas

DATABASES

MongoDB, PostgreSQL, Redis

CLOUD & INFRA

Docker, Kubernetes, AWS S3, Nginx, Uvicorn, DigitalOcean

DEVOPS & TESTING

GitHub Actions, CI/CD, pytest, Playwright, Git

FRONTEND

React, Next.js, TypeScript, Vue, Nuxt, Tailwind CSS

CERTIFICATES

• Data Structures in Java

Coding Ninjas · May 2023

• Frontend — React.js, JavaScript

Coding Ninjas · Jul 2023

• Backend — Node.js, Express, MongoDB

Coding Ninjas · Oct 2023

EDUCATION

Bachelor of Science in Computer Science

Mahaveer Institute Of Science and Technology, Hyderabad
Sep 2017 – Aug 2021

Intermediate in MPC

Narayana Junior College, Hyderabad Aug 2015 – Jul 2017
